V6D Federated States of Micronesia -update September 25 by Rolf DL7VEE

After three days, we have over 20,000 QSOs in the log, even though we are not yet QRV on all bands.

Unfortunately, the missing luggage with the two-element wire beam and the fifth station has not yet arrived. We check with TKK Airport on Chuuk every day. That's why we improvised today and set up additional single-band wire antennas for 160, 17, and 10m using our spare equipment. We will try 160m tonight.

The weather is hot and humid with occasional storms and heavy rain.

Our log is online at Club Log and is updated at least once a day. Most of the time, the [V6D livestream](#) runs with all four stations. The QSOs currently being made are displayed with a delay of a few seconds. One station is used most of the day for CQ in FT8 on 50.313 MHz. We are very pleased with the good openings on 6m towards Japan and China. 80m is also working quite well. The team is in good shape and highly motivated, and is still hoping for the arrival of the missing radio equipment. The two pieces of luggage are at Tokyo Haneda Airport. It is not easy to organize forwarding from here.

FP5KE Saint-Pierre & Miquelon -update September 24

Yesterday, after 7 days of activity, FP5KE crossed the symbolic milestone of 100,000 QSOs; more than half of which are in human modes (CW, SSB & RTTY).

PJ7K Sint Maarten -now QRT

With almost 85K QSOs in the log, earlier today the PJ7K team donated a Spiderbeam antenna to local operator Airon PJ7AR. Tomorrow, September 22, the team will start to dismantle antennas and plan to go QRT around 1000z on Tuesday (23rd).

VP2MAA Montserrat -update by Franco VP2MAA / J88BTI

My departure for Montserrat is now scheduled for Wednesday, 24th September. VP2MAA will be on the air by 00.00 of the 25th CW-SSB-FT8. The initial antennas will be a horizontal loop for 40 meters, working on 6 to 40 and an inverted V for 80 meters, same as J88BTI.

Montserrat is ranking #71, data modes, in Club Log's most wanted list. I will try to satisfy that request with an ongoing 24 hours operation, while dedicating as much time as possible to the so called human modes. Do not expect too much activity on 6 meter at the moment, but the good news is that Steve, HA0DU is donating a 4 elements beam that should reach me at the beginning of October.

3G0XQ San Ambrosio Island -update by Felipe XQ7IR

After having a successful and exciting expedition last month on Islote Pájaros IOTA SA-100 (3G1P), I am pleased to report that the San Ambrosio (CE0X) project continues with important progress in the mission to put this exciting and rare entity "ON AIR".

A few days ago, I participated in two important meetings with the authorities responsible for granting permits and authorizations for this expedition to the Desventuradas Islands, so I'm in position to share the following information:

— Dates: The authorized dates for this Dx-Activity will be between January 12, 2026, and February 15, 2026, which represents at least 25 days of operation on the island.

3C2MD Equatorial Guinea -postponed

We sadly announce to Amateur Radio community that 3C2MD, our long awaited expedition to Equatorial Guinea, will be postponed to unknown future date because a sudden stop to all the Amateur Radio licenses declared by the local Government.

The reason of that decision has been due to "problems with license granted to two foreigner citizens" that, according to the local news, tried to operate from "sensitive part of the country" without all the necessary permissions in the early part of September. You may already have seen the online press articles about this fact. Because of their behaviour, the two foreigners had been obliged to stop their radio operations, so they decided to go back home before they had planned to.

VP2V, BRITISH VIRGIN ISL Seth, N4XTT and a team of young operators will be active as VP2VRX during the CQWW SSB contest. This operation features a team of operators (W3MLJ, KC1KUG, N4XTT, K4BEN and KC3VPB), all in their late teens and early twenties, who bring energy to DXpedition activities. The group has been planning this operation for many months, coordinating equipment, antennas, and logistics for a memorable and fun operation for both the team and the stations they work.

The timing works out well with the CQ Worldwide SSB Contest happening that weekend, which will bring lots of participation from stations worldwide. The plan is to start things off with a few days operating as NP2R from the US Virgin Islands (October 20-22); allowing the team to test equipment before moving over to the British Virgin Islands for the main VP2VRX operation during the contest (October 23-28). They'll be running multiple stations simultaneously during the contest. Outside the contest, the operators will each be active as VP2V/call on various

modes/bands.

VP8, SOUTH GEORGIA ISLAND Amateur Radio DXpeditions (ARD) is proud to announce plans for a groundbreaking DXpedition to South Georgia Island, set to take place in March 2027.

Operating under the allocated callsign VP0SG, this ambitious activation will target one of the rarest and most logistically challenging DXCC entities, well ranked on top of the Club Log's Most Wanted List, with particularly high demand in some areas of the world.

ZD9, TRISTAN DA CUNHA DX-World has learned that a Tristan da Cunha Dxpediton is in the pipeline for 2025. Whilst it is quite some time away, we have gleaned the following info.

It will be a 3-4 month long DXpedition to ZD9 which could be extended by another 2-3 months bringing it to (potentially) 6+ months. The additional months could depend on PayPal donations / extra donors. Focus is going to be on CW & SSB. There will be VERY LIMITED usage of FT8. In fact, FT8 will ONLY be used on 80 & 160 meters. Bands of operation will be 10 meters to 160 meters. 1kW to monoband heavy duty vertical antennas due to Tristan da Cunha's very inhospitable weather.

ZL7, CHATHAM ISL Stan, LZ1GC will be operating as ZL7/call between November 3 and November 20. Operation from 160 to 10 meter with 2 stations using CW, SSB and FT4/8. Stan will use a combo of verticals, GP antennas and VDA's. QSL via home call, OQRS.

The initiative, taking place on the iconic Mussulo Island, aims to serve as a bridge between peoples and cultures, connecting Angola with thousands of radio amateurs across all continents. Through the airwaves, Angolan and international voices come together to share a message of peace, unity, and progress.

With local logistical support and collaboration between operators, the D2A operation is equipped with high-level communication infrastructure, enabling 24/7 global radio contact throughout the duration of the event.

Driven by a strong spirit of cooperation, this multicultural and multidisciplinary team joins forces to bring Angola to the world—and the world to Angola—using the magic of radio as a means of connection.

Beyond its patriotic symbolism, this amateur radio activation highlights Angola's role within the global amateur radio community, promoting the country as a vibrant destination rich in history, nature, and hospitality.

D2A is more than just a callsign – it is a symbol of international cooperation, passion for communication, and Angolan pride at a time when the nation celebrates half a century of sovereignty and nation-building.
